

INSTRUCTIONS FOR PAPER FAN PINWHEEL

1| Print out desired pages. For small pinwheels, print out the page that has the design divided into 3 sections; for larger pinwheels, print out the design that is divided into 2 sections (note: for the larger pinwheel, you will need to print out 2 pages of that particular design because you will need 3 lengths of the design for the pinwheel.)

2| Cut page down cut lines. You'll want 3 sections, regardless of the size.

3| Using a glue stick, glue the shorter ends together, making one long strip.

4| Along the short side, begin folding the long piece of paper as a fan: fold about 1/2" over, flip the paper and fold it back, repeating until the entire length is fan-folded.

5| With Scotch tape, tape around the bottom of the fan, so it looks like an actual fan. Be sure to use the entire width of the tape and circle completely around. Repeat if necessary.

6| Add glue to the outermost pieces of both sides of the fan and attach them together to create a fan circle.

7| Clip glued edges together with a clothes pin, paper clip, binder clip, etc. to secure fan while it dries.

8. After it is dried, scotch tape a piece of thread to the backside of the fan. With the other end, tape to the ceiling or wrap around a curtain rod, underneath an umbrella. You can also tape to the walls for a cluster effect.

9| Hang varying designs and varying sizes to maximize these decorations.

Optional: Tape or glue a popsicle stick to the back and use as a kid craft or fan!
